Advantages & Benefits

- Simplified reinforcement and faster installation around openings and columns
- Ductile behaviour in the slab and thinner slabs when designed for shear controlled loading
- Easier installation of flexural reinforcement since there is no interference
- Ductile seismic behaviour
- Possible elimination of column capitals, drop panels and stirrups
- Overall lower cost and faster installation

SRL Industries is certified by the ICC Evaluation Service, the most widely accepted and trusted evaluation service in North America.

Our evaluation report number is **ESR-2938** issued March 1, 2010.

For more information visit www.icc-es.org.

What are other people saying about SRL Industries Ltd?

"I've been dealing with Wayne and Dairen for over ten years, and it's obvious that they've built SRL based on customer service. When you combine this with their high quality products, they become very easy for me to recommend."

SRL Industries has been manufacturing studrails since 2001. Over the past few years we have seen a substantial growth in our sales which now includes Alberta as well as BC. We have evolved into a company that now does major projects such as the new RCMP headquarters in Surrey and towers like the Shangri-La, which is currently the tallest tower in Vancouver. For more information as to what projects we are involved with you can visit our website at www.srlindustries.ca to see current and past projects.

About SRL

SRL Industries is a growing company that has been in business for over ten years. Our shop is a CWB certified shop that specializes in SRL Shear Rails, which is an alternative to, but not associated with Decon™ Studrails™. Our Shear Rails are manufactured to the highest industry standard using PSR (punch shear resistance) studs. We also do header bars, imbeds, and miscellaneous metal fabrication.
